

TELAR is committed to carrying out tunnel works, basic sanitation, and public and private building projects, ensuring quality, health, safety, and environmental protection in its operations through its integrated management system, and undertakes to:

# 01

Meet the requirements of clients, partners, and employees

# 02

Train and engage employees, service providers, and partners under its responsibility on quality, health, safety, and environmental matters in the projects

# 03

Comply with legal requirements and other obligations subscribed by Telar

# 04

Continuously improve the integrated management system

# 05

Promote consultation and participation of employees on matters related to health and safety

# 06

Provide safe and healthy working conditions, eliminating hazards and reducing risks

# 07

Prevent pollution by minimizing environmental impacts

# 08

Provide sustainability practices at construction sites and other work environments

TELAR's Integrated Management System (IMS) consists of the integration of certifications with the following standards: NBR ISO 9001 – Quality Management; General Regulations of SiAC from PBQP-H – System for the Evaluation of Conformity of Companies in Civil Construction Services and Works; NBR ISO 14001 – Environmental Management; and NBR ISO 45001 – Occupational Health and Safety Management.
